**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

This Office action is responsive to communication received 07/16/2003 – IDS;  
07/24/2003 – IDS.

Claims 1-11 are pending.

Following is an action on the MERITS:

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-11 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of copending Application No. 10/065,233. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference between the claimed invention of the '233 application and the instant claims is that the claimed invention of the '233 application includes a further recitation that the width of the sole range from 0.060 inch to 1.50 inches in both claims 1 and 11. Moreover, the claimed invention presented in claims 7, 8 and 10 of the '233 application differs from the claimed invention detailed in claims 7, 8 and 10 of the present application in that the '233

Art Unit: 3711

application recites slightly different % values for the volume percentage of the central member and the mass percentage of the club head. The claims of the '233 application are generally more specific than the instant claims and include all of the limitations of the instant claimed invention. One of ordinary skill in the art would have found it obvious to eliminate the dimension of the sole in the '233 application, as the claimed sole width sets forth a range that is typical for iron-type club heads. The skilled artisan would have found it obvious to vary the sole width based upon specific golfing parameters. For example, irons in a set of clubs often vary in sole width based upon the shaft length and loft angle of the club head, this in response to varying requirements for the follow-through portion of a swing based upon the desired ball trajectory and optimal flight distance of a struck ball. Moreover, the sole width will affect the drag on the club and thus the skilled artisan would have found it obvious to vary the width within a range to adjust the amount of drag. Additionally, the skilled artisan would have found it obvious to vary the mass percentage of the club head and the volume percentage of the central member of the '233 device based upon specific weight requirements for an individual golfer.

With respect to claims 2-6 and 9, of the instant application, note claims 2-6 and 9, respectively, of the pending '233 application, wherein the limitations presented in the claimed device of each application are identical.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 3711

Enclosed with this Office action is a sample terminal disclaimer which is effective to overcome a provisional obviousness-type double patenting rejection over a pending application (37 CFR 1.321(b) and (c)).

Also enclosed is a sample Statement Under 37 CFR 3.73(b) (Form PTO/SB/96) which an assignee may use in order to ensure compliance with the rule. Part A of the Statement is used when there is a single assignment from the inventor(s). Part B of the Statement is used when there is a chain of title. The "Copies of assignments..." box should be checked when the assignment document(s) (set forth in part A or part B) is/are not recorded in the Office, and a copy of the assignment document(s) is/are attached. When the "Copies of assignments..." box is checked, either the part A box or the part B box, as appropriate, must be checked, and the "Reel\_\_\_\_, Frame\_\_\_\_" entries should be left blank. If the part B box is checked, and copies of assignments are not included, the "From:\_\_\_\_\_ To:\_\_\_\_\_" blank(s) must be filled in. This statement should be used the first time an assignee seeks to take action in an application under 37 CFR 3.73(b), e.g., when signing a terminal disclaimer or a power of attorney.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Swanson shows a typical sole width (Figure 3).
